7. Briefly describe the activity or project for which funding is requested (no more than 500 words).

This project provides money for research & development, as well as procurement of F-15 RWR and EPAWSS. The F-15 currently employs a 30-year old RWR that is unable to provide adequate threat warning against many current and emerging radar systems. To ensure survivability and air superiority, the F-15 requires an advanced RWR / EPAWSS that can quickly and accurately detect, locate and identify current and emerging threat systems.

8. What is the purpose of the project? Why is it a valuable use of taxpayer funds? How will the project support efforts to improve the economy and create jobs in Oregon?

The F-15C/D is at risk from current and future threat systems. F-15s will remain at risk to several current threats, as well as most advanced threat systems, resulting in areas of "denied access" that significantly impacts the F-15's ability to accomplish operational missions in support of Combatant Commanders.

9. Has this project received federal appropriations funding in past fiscal years?
